## Appendix

### COATINGS AND USES

Tinplate is steel sheet electroplated with tin to provide enhanced appearance and protection against rust. Coatings can be added to tinplate to enhance appearance and performance. Coatings and their typical uses\* are listed below.

Outside	Plain	(POS) Use in dry environments where the risk of oxidation is low
	White	(WOS) Additional protection against oxidation of the container due to moisture Also used on most printed cans as the white base coating under colour print
	Varnish	(VOS) Clear finish for extra protection against oxidation of the container due to moisture
Inside	Plain	(PIS) <b>Typical uses:</b> Solvent based products Oil paints Edible oils <b>Not suitable for:</b> Water based products Olive oil
	Lacquer	(LIS) <b>Typical uses:</b> Water based products Water based paints Olive oil

\* Uses above are suggestions only, customers are responsible for testing to ensure compatibility of containers with their packed product.
